## KOZANA CHARDONNAY 2020

Kozana polje | Goriška Brda, Slovenia  
Altitude: 127.2 m

A bit more windy area. North west exposure, but very sunny, it's almost like a "plato". Opoka soil, with big blocks of stones, a lot of water in depth of the hill, very good draining capability. Vines with very deep roots. Planted 1986.

It shows deeper golden colour with a nice brilliance. On the nose it presents a moderately intense basket of flowery and fruity note with a touch of minerality and supported by clear, though refined notes from oak ageing. There is a complete impression which can be qualified simply as a top-class chardonnay bouquet.

Dry with a moderate acidity levels, full bodied, lush and abundant. Oily texture, opulence, rather intensive fruity notes and quite intense flavour character are typical Kozana attributes. Flashy but not screaming. Very well defined and intense. Depth and power of its aromatic profile are undeniable. If Fojana expression is slightly unusual, Kozana is much closer to the classical expression of Chardonnay as we know it but remains original. In a top condition (March 2023). A top-notch Chardonnay!

Drink from 2023–2030.
